

# Persuade your boss – Why Silverbucket?

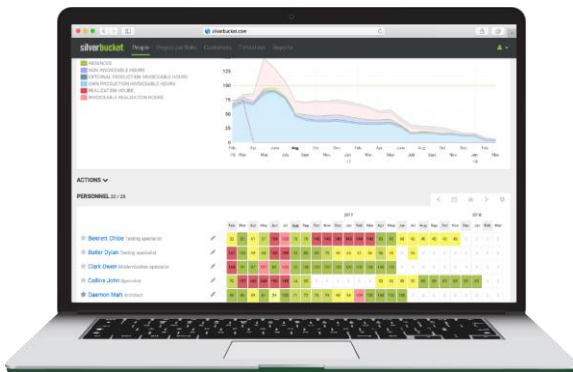

Silverbucket is a web-based software for project resource allocation management. Become a smart planner, like Sweco, Ramboll, HiQ, Solita and 100 other who manage their project resource allocations with Silverbucket.

## A user-friendly tool

- Favoured by its users
- Easy to learn
- Useful for many counterparts (e.g. top management, project managers, team managers, base users)

## Several benefits & advantages

- Better utilization of capacity and resources
- Detect resource problems at an early stage
- Clear visibility to resource situations and overviews

## Quick rollout

- We can create your environment in a day
- User training & workshop are provided
- We support you to execute a successful rollout

## Integration-friendly

- Integrations to different backend systems are possible
- The specifications are agreed with the customer

## Fair terms

- No life-long contracts
- Monthly payment (billing cycle is three months)
- Like the rollout, also termination of agreement is simple
